Innovative Fishing Floats and Accessories

CRAUSSO,  
CHOICE OF THE WINNERS

[www.cralusso.com](http://www.cralusso.com)

From the 900.000 enterprises based in Hungary Mr. Karoly Kralik was chosen, due to his domestic and international results, the creator of Cralusso float range was asked to become a Hungarian Talent Ambassador.

When I decided to launch the company Cralusso, I was very aware that I did not just want to produce floats that were amendments and variations of those already available. I knew that I had to think and work in different ways to the norm - "thinking outside the box" if you like - only that would lead to really new designs and true innovation.

I did not want to create just floats but solutions that made easier and more efficient the catching of fish. In the last nine years, thanks to these revolutionary designs and solutions, Cralusso has become the leading float developer in the angling industry.

The unique solutions of our products help the anglers realize their dreams, be it the title of world champion or the biggest catch of their lives. Our innovative products are marketed and used in nearly 30 countries, thanks to their unique operation and excellent quality.

### Crausso, choice of the winners

In 2015 has reached another World Cup victory with our products. The Club's Team World Championship, which held in Zilina, the Slovakian Team take possession of first place with Cralusso floats

### Main milestones:

2002: Launch Cralusso  
2003: World Championship – Torpedo  
2005: European Championship – Torpedo  
2006: Innovation Expo, GENIUS award  
2007: U.S. Open – Golf and Bubble  
2008: European Championship – Torpedo  
2008: U.S. Open – Shark  
2008: Hungarian National Championship – Shark  
2009: Best Stand award  
2010: Sponsorship at Poznan World Cup  
2012: Title of Hungarian Talent Ambassador  
2013: Expand the NAVIGATOR line

2014: Dutch men's team – the title of world champion  
Hungarian team of disabled people – individual and team title of world champion  
Hungarian team of veterans – world champion bronze medal

2015: Best Stand award  
Slovakian Team won the Club Team World Championship with Torpedo floats

József Pilán, Cralusso's test angler was awarded a world championship bronze medal at the age of 70.

Newness

Bream Float  
9. page

Telescopic bankstick • 41. page

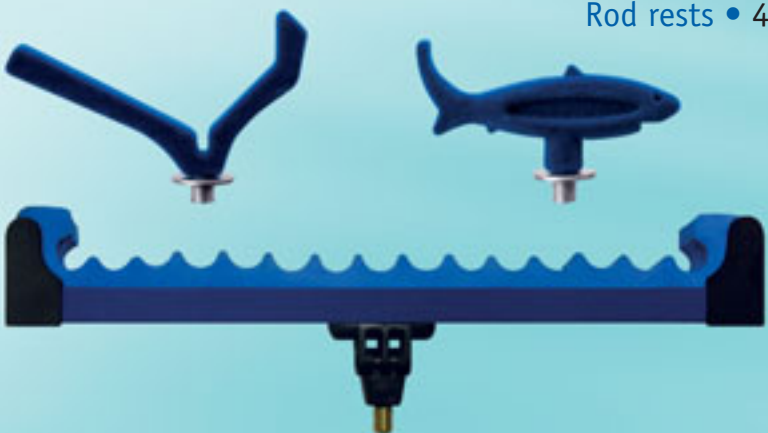

Lines • 26. page

Buzz bars • 42. page

Rod rests • 43. page

A new hydrodynamic form developed by Cralusso, the body does not lift out the water when held back. This float is for use on the pole and is ideal for use in medium or strong flow when you wish to present static or slow moving baits. It is so good and reliable that it has become the number one choice of flat float for anglers of all abilities including a few world champions!

Some quotations about the Torpedo:

• **Alan Scotthorne:** "The best flat float I've ever used"  
*Angling Times, May 10 2005.*

• **Bob Nudd:** "It will add a new dimension to your polefishing"

*Angling Times 31 May 2005*

Sizes:

0.5 - 0.75 - 1.0 - 1.5 - 2.0 - 3.0 - 4.0 - 5.0 gr

Code: 1001

## **TORPEDO** Tuning

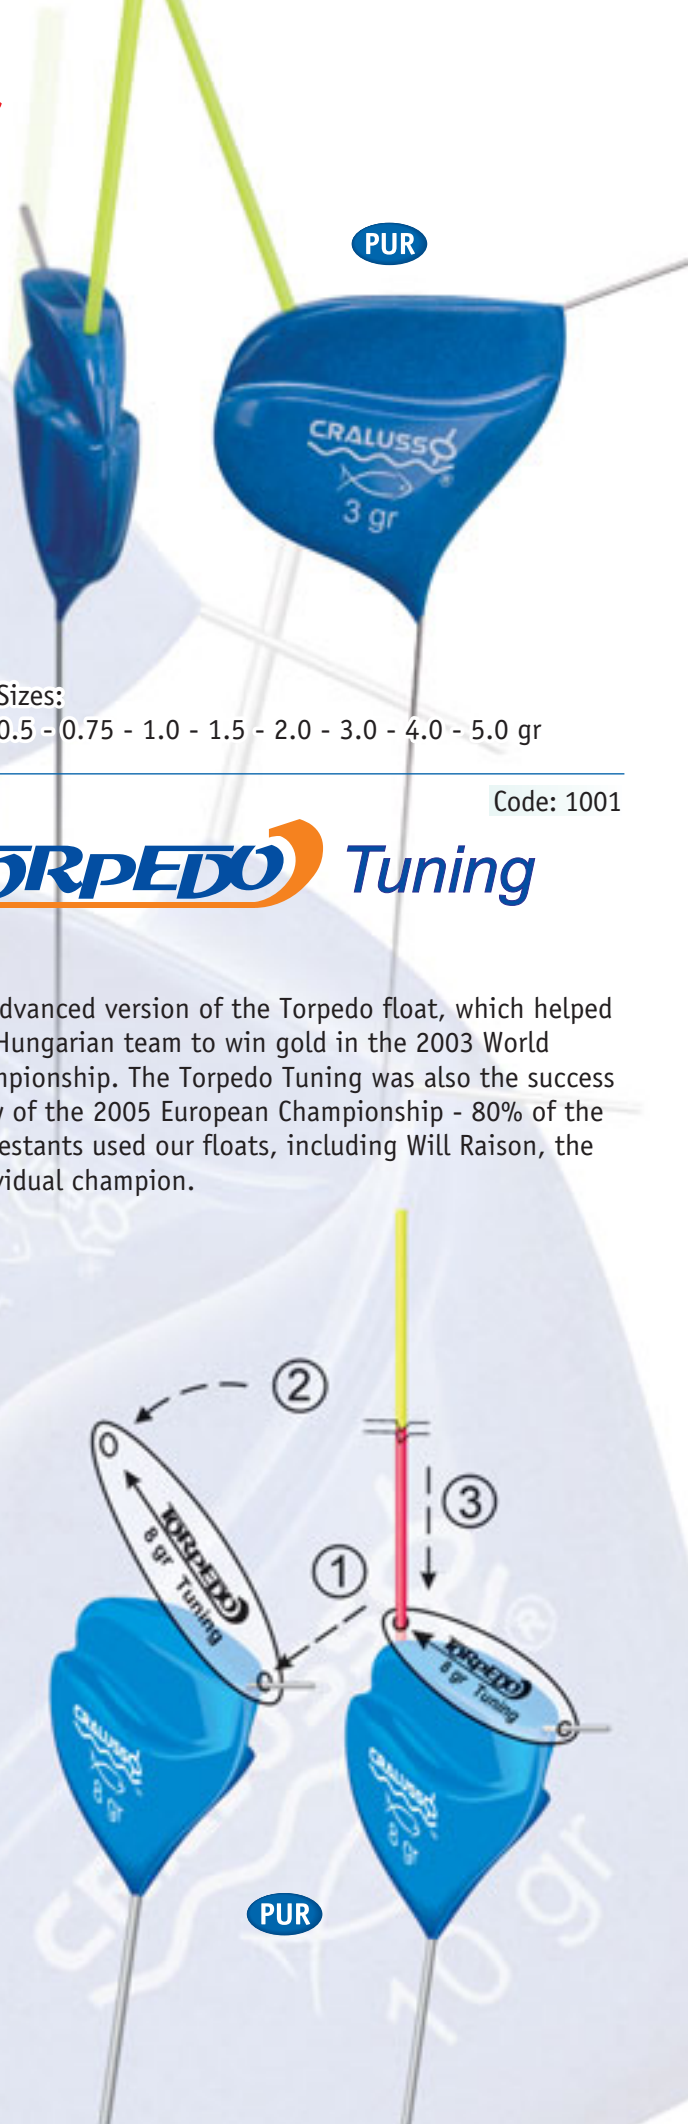

An advanced version of the Torpedo float, which helped the Hungarian team to win gold in the 2003 World Championship. The Torpedo Tuning was also the success story of the 2005 European Championship - 80% of the contestants used our floats, including Will Raison, the individual champion.

As with the Torpedo, this float is for use on the pole and is ideal for use in medium or strong flow when you wish to present static or slow moving baits.

Sizes: 6 - 8 - 10 - 12 - 15 - 20 - 25 - 30 - 40 - 50 - 70 gr

With recommendation of Tibor Ambrus, world champion

Code: 1003

A river float designed for use on the pole but has found favour with many anglers on the running line. It is ideal for running through the swim at variable speed. The Bubble was introduced in 2005 Madunice European Championship.

**The winner of U.S. Open in 2007 and 2008!**

Variable antenna 1-5 gr 2 pcs  
Variable antenna 6-20 gr 5 pcs  
Waterproof polyurethane body  
Floats can be changed without dismantling the rig

Sizes:

1 - 1,5 - 2 - 3 - 4 - 5 - 6 - 8 - 10 - 12 - 15 - 20 gr  
30 - 40 - 50 gr

The next step of success!  
József Papp won the 2008 U.S. open using  
a Cralusso Bubble

Functions of two floats in one 2 in1

Code: 1004

- ① You should use the first antenna position when you are holding the float back hard or even lightly.
- ② You should use the second antenna position when you want the float running through the swim

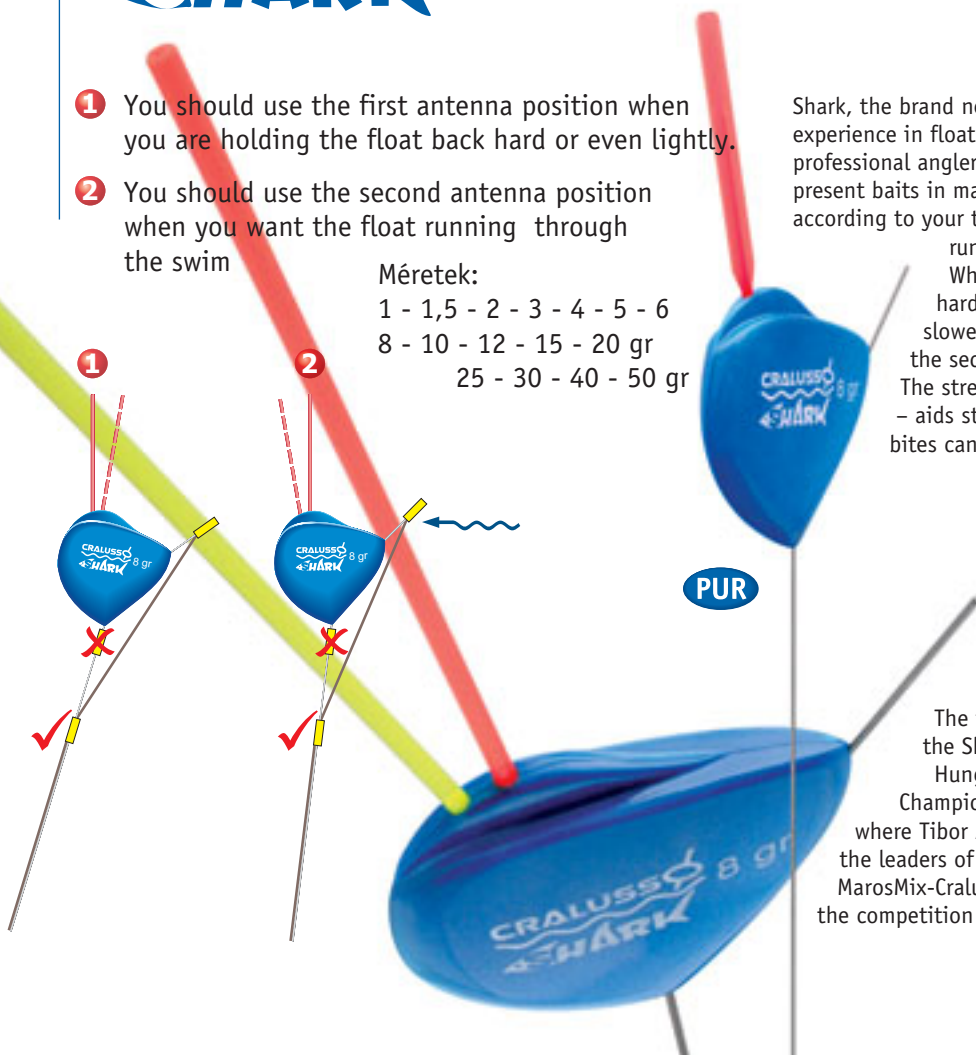

Méretek:

1 - 1,5 - 2 - 3 - 4 - 5 - 6  
8 - 10 - 12 - 15 - 20 gr  
25 - 30 - 40 - 50 gr

Shark, the brand new flat float was developed using many years of experience in float design and was in response to the demand from professional anglers. Used primarily for pole fishing the float can present baits in many ways. The antenna position can be changed according to your technique – whether this is holding back hard or running the float through the swim.

When the current is strong or you are holding back hard use the first bristle position. When the flow is slower or you want to run the float through the swim the second bristle position is recommended.

The streamline hump on top of the float – the sharks fin – aids stability and sensitivity – even the smallest of bites can be seen clearly.

PUR

The introduction of the Shark was at the Hungarian National Championship in 2008, where Tibor Ambrus, one of the leaders of the Tubertini-MarosMix-Cralusso group won the competition using this new float.

Code: 1027

This hard-wearing polyurethane disc float developed by Cralusso can take the place of traditional balsa models, that can be damaged easily.

Sizes:

1 - 1,5 - 2 - 3 - 4 - 5 - 6 - 8 - 10 - 12 - 15 - 20 gr  
25 - 30 - 40 - 50 gr

The favourite float of the world championship held in Croatia in 2014, helping the Dutch team to earn the title of world champion

In this competition, Alan Scotthorne – five times individual world champion of England – and many other teams have used the innovative Cralusso floats!

# Surf

Code: 1002

A special river float for use with rod and reel set ups that can be held back hard without drifting in across the flow. The direction and speed can be changed easily offering perfect and accurate presentation. Ideal for medium and strongly currents although it can be used on still water for predator fishing when you wish to work a baitfish parallel to the bank.

Sizes:

3 - 4 - 6 - 8 - 10 - 12 - 15 - 20 gr

# Bolo

Code: 1005

Sizes:

3 - 4 - 6 - 8 - 10 - 12  
15 - 20 gr

A river float for use Bolognese rods and any running line set up. The design allows you to hold the float back without it drifting in across the flow. You can vary the speed of travel easily, but in sufficient flow and by holding back hard it is possible to lead the Bolo out from the bank toward features, cover or your feed line. You can effectively position the float before letting it run through the swim.

# Revolutionary new waggler designs from Cralusso

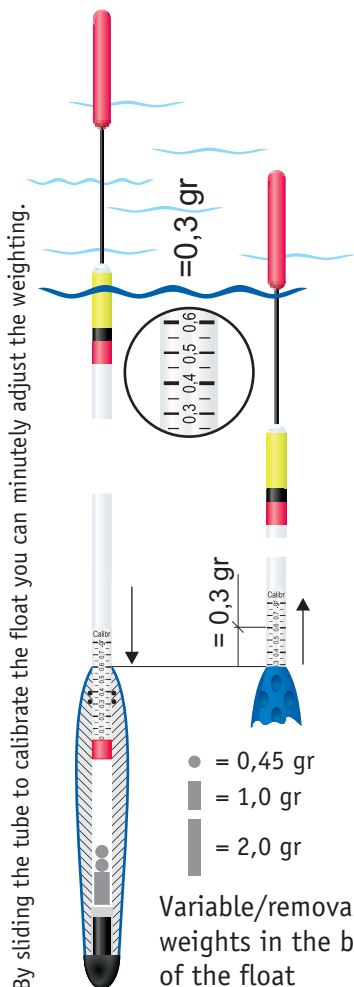

## ROCKET

Code: 1006

We developed the Rocket for long, accurate, straight casting. The Rocket has unique features that enable it to fly much better than traditional wagglers - even those with flights

1 2 3 4

Thanks to the versatile and adaptable antenna system, twenty Cralusso sight tips can be used with this float. Three tips are contained in each pack.

The stem of the float is made from a material that is very strong and will remain straight without becoming twisted or curved.

The calibration system helps quick, simple and accurate adjustments. with 0,05 gr graduations being possible

The aerodynamics are improved with surface indentations (as on a golf ball) which reduces air resistance and increases stability.

1

2

3

PUR

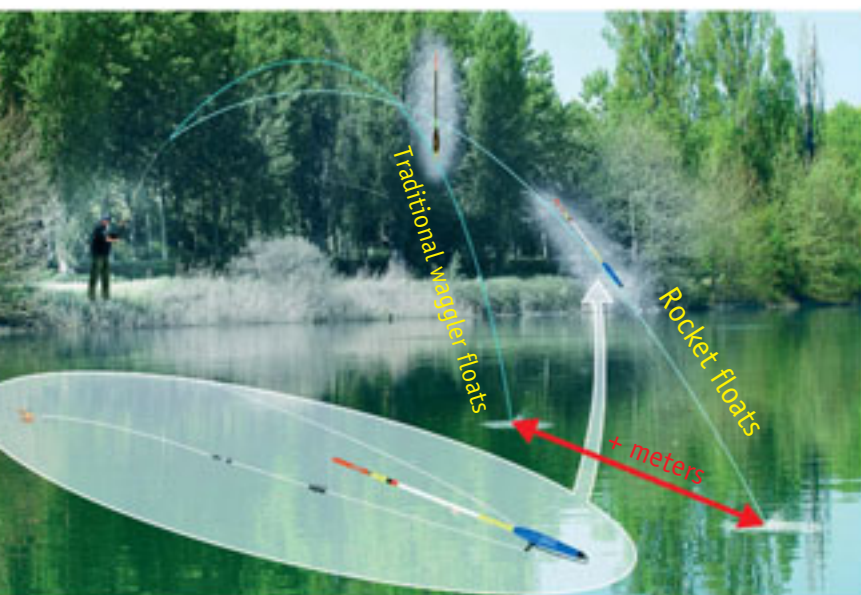

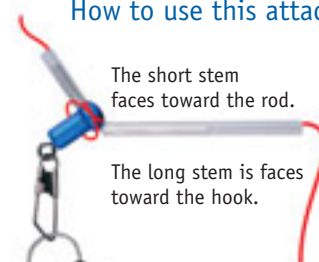

The critical element of the Rocket design is the special attachment system. This ensures the optimum position of the float and the terminal tackle it is 'towing' during flight - thus ensuring maximum distance and accuracy is achieved.

When you use this floats after casting you should hold back the float before it falls down into the water to eliminate the possibility of tangles.

Size gr	Changeable weight
6	2,0 gr
8	2,5 gr
10	3,0 gr
12	3,0 gr
14	3,0 gr
16	3,5 gr
18	3,5 gr
20	3,5 gr

Recommended float adaptors:  
Anti tangle waggler attachment  
Size: Small, Medium  
Code: 2006

How to use this attachment?

Code: 1007

The Ufo and Dart floats utilize Cralusso's innovations, which give them their efficacy and popularity.

1 2 3 4

Adjusting the antenna and the sensitivity can be performed repeatedly using the calibration solution. They've become preferred by the anglers because of their versatile, simple usage and their durable design.

The concept is the same as that found in the UFO waggler but in addition to the other latest developments this version incorporates a flight.

1 2 3 4

The body is made of polyurethane, which is not sensitive to surface damage. The Dart is a very versatile float, which is a suitable for both pleasure and match anglers alike.

PUR

The aerodynamics are improved with surface indentations (as on a golf ball) which reduces air resistance and increases stability.

Recommended float adaptors  
Waggler Attachment Light: 2005  
Brass Head Safety Snap: 2122  
Plastic head swivel with interlock snap: 2123

4

**ROCKET**  
—Light—

Code: 1014

This model – Rocket Light – has an extraordinary flying ability. While retaining incredible accuracy it is possible, because of the attachment system, to cast 20-30% longer distances than with traditional floats.

Size gr	Changeable weight
1,5	1,0 gr
2,0	1,0 gr
2,5	1,0 gr
3,0	1,0 gr
4,0	1,5 gr
5,0	1,5 gr
6,0	1,5 gr
8,0	1,5 gr

**DART**

Code: 1008

1  
Year  
Guarantee

1

Thanks to the versatile and adaptable antenna system, twenty Cralusso sight tips can be used with this float. Three tips are contained in each pack.

The removeable dart wings help the floats to the flight.

2

The stem of the float is made from a material that is very strong and will remain straight without becoming twisted or curved.

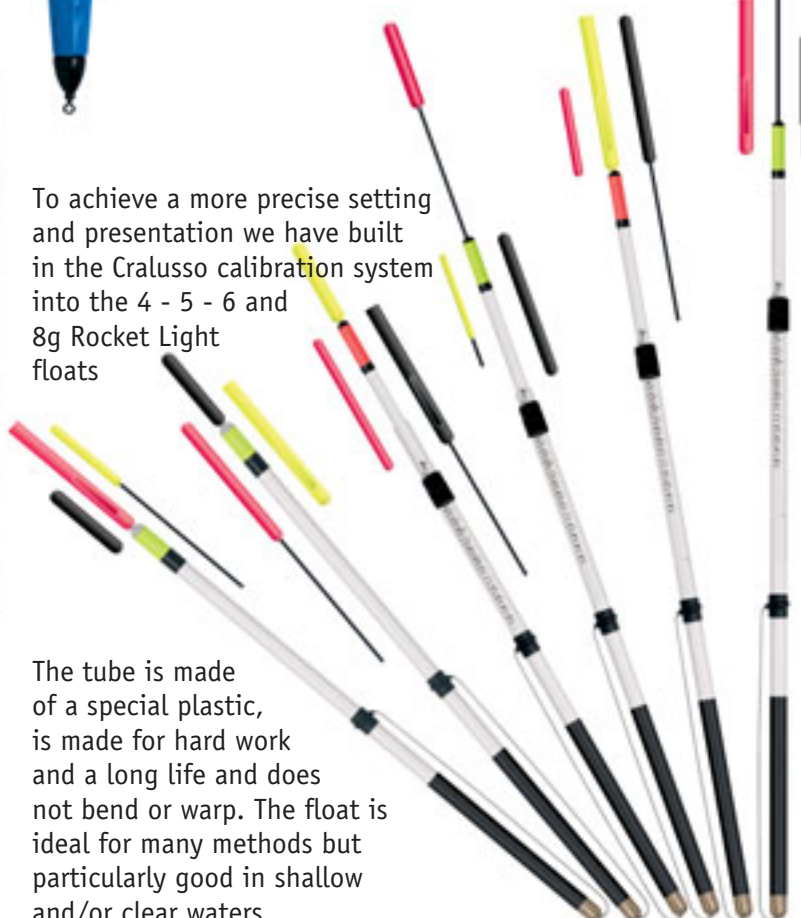

3

The calibration system helps quick, simple and accurate adjustments. with 0,05 gr graduations being possible

Size gr	Changeable weight
6	2,5 gr
8	3,0 gr
10	3,0 gr
12	3,0 gr
14	3,5 gr
16	3,5 gr
18	4,5 gr
20	5,5 gr

To achieve a more precise setting and presentation we have built in the Cralusso calibration system into the 4 - 5 - 6 and 8g Rocket Light floats

The tube is made of a special plastic, is made for hard work and a long life and does not bend or warp. The float is ideal for many methods but particularly good in shallow and/or clear waters.

The aim of continuous innovation  
to create the best waggler float!

*Black Eagle*

Code: 1080

**BREAM FLOAT**

Code: 1082 **NEW**

**Wolfram Match**

Code: 1085

Size gr	Changeable weight
6	1,5 gr
8	2,5 gr
10	3,0 gr
12	4,0 gr
14	5,0 gr
16	6,0 gr

We have been ecstatic over the success of the Arrow waggler but we never rest and have achieved even further improvement for this year. In addition to the already successful developments

**1 2 3 4**

we are now using a weight system that is twice as heavy as brass.

This lead/tungsten combination disc system together with the new aerodynamically refined body has created an even better flight, operation and precision in use.

The antenna system consists of over 20 versions with varying diameters, lengths and colours available. New to this range are the 'air antenna' - a clever highly visible tube and a very sensitive solid option.

Size gr	Changeable weight
8	2,5 gr
10	4,5 gr
12	6,5 gr
14	8,5 gr
16	10,5 gr
18	8,0 gr
20	10,0 gr

**Tip:** With the help of the unique calibration system you can speed up the float setting process and also achieve very precise setting of the antenna.

The new combination of lead and tungsten weight discs has a high specific gravity and is therefore only half the volume of brass.

New antenna with helium

# Velence

Code: 1009

Sizes: 5 - 7 - 9 - 11 gr

Variable antenna 3 pcs

# Sensitive

Code: 1010

Sizes: 5 - 7 - 9 - 11 gr

Variable antenna 2 pcs

Type	Distance of Casting	Changeable weight
<b>Velence</b> 5-11 gr	35-60 m	1,0-2,5 gr
<b>Rocket</b> 6-20 gr	40-85 m	2,0-3,5 gr
<b>Rocket light</b> 1,5-8 gr	20-60 m	+ 1,0 gr
<b>Dart</b> 6-20 gr	35-65 m	2,5-5,5 gr
<b>Sensitive</b> 5-11 gr	35-55 m	1,5-3,0 gr
<b>Ufo</b> 6-20 gr	30-50 m	2,5-5,5 gr

The advantage of these floats is the excellent sensitivity! The Velence and the Sensitive incorporate all of Cralusso's new technical solutions

## ARROW waggler

Code: 1040

Incorporates a removable brass disc weight system and, of course, all the usual Cralusso innovative features

① ② ③ ④

The ARROW waggler ensures an aerodynamic flight, high levels of sensitivity and offers a multifunctional, easy to use float. The longer stem offers the following advantages:

- Generates extraordinary stability and distance in flight
- The body and main weight of the float sits deep in the water and it is therefore less influenced by wind and surface skim
- The long float aids the important task of getting your line deep in the water

Transportation of the long float is not difficult as the stem and body can be separated. This allows the carrying of made up rods where required with no risk of float damage.

Size gr	Changeable weight
8	3,0 gr
10	4,0 gr
12	5,0 gr
14	6,0 gr
16	7,0 gr
18	8,5 gr

## HeliO

Professional waggler float with calibration system, new body shape, made using tungsten & helium!

Code: 1086

Our newest innovation, the HELIO waggler float incorporates the best of our knowledge. We used materials with the most optimal density, this means that the lead head, the tungsten discs and the helium-filled float body and shank provided the possibility to build an ideal float, which

- has the best flying capabilities;
- can be set to the highest sensitivity
- can be weighted in the shortest time
- has a stem that does not bend even on higher temperatures
- resists damage
- can hold over 30 types of antennas

Size gr	Changeable weight
8	2,5 gr
10	4,5 gr
12	6,5 gr
14	8,5 gr
16	10,5 gr
18	8,5 gr
20	10,5 gr
25	10,0 gr
30	15,0 gr

*Attention! The body and stem of the floats are filled with helium, the calibration stem shouldn't be extended further than the red mark!*

New antenna, with helium

PUR

Lead - tungsten combined weight system

The new combination of lead and tungsten weight discs has a high specific gravity and is therefore only half the volume of brass.

## ZeroSlider

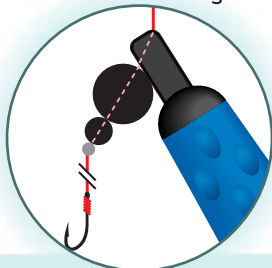

Code: 1013

- **0 gramm** is incorporated in the body. This ensures you can use maximum weight down the line and, when necessary, smaller floats can be used.
- It has an outstanding flying ability thanks to the Z shaped line stop system.
- It has the advantages of the brand new development of Cralusso waggler floats. (See: 7. page: 1-2-3)

PUR

When the float lands on the water

In the water

Sizes: 8 - 10 - 12 - 14 - 16 gr

## ProSlider

Code: 1087

Heeding the requests of the anglers, we added to our offer this easy to use, easy to throw Slider float, which satisfies the highest demands of the hobby and sport anglers. The 3.0 gr net weight of the special slider head and the design of the PUR body give excellent flying capabilities to the float. It is mainly recommended for deep water and lakes with strong currents, when the bait needs to be sunken to the vicinity of the lakebed quickly and in a stable way.

- Simple, precise usage
- Fastest antenna and sensitivity adjustment with the help of the calibration system.
- Versatile variability for weighting
- Replaceable solid and air-filled antennas

Sizes

3 + 8,0 gr
3 + 10,0 gr
3 + 12,0 gr
3 + 14,0 gr
3 + 16,0 gr
3 + 18,0 gr

**Tip:** The new waggler stem set (Item: 2034), increase the capacity and variability of the float. The different length of stems (250-330), can be accelerate the balance, furthermore increase the distance of flight.

Sizes: 8-10-12-14-16-18 gr

This near indestructible float has been made for the ever more popular method of pellet waggler fishing. Being short it can be used successfully when fishing shallow and presenting baits deeper is no problem. You can fish precisely with different sizes and weights of pellet by making adjustments to the capacity of the float using the calibration system.

PUR

Sizes:

Code: 1030

Sizes:  
3-4-5-6-8 gr

## Rocket Pellet

Code: 1012

This float incorporates all the advantages of the pellet float but also utilises the rocket system.

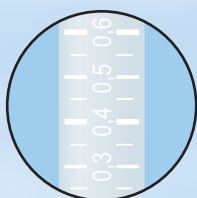

Normal pellet wagglers are hampered in flight because the float is trying to tow a big bait. Aerodynamics, distance and accuracy are therefore adversely affected.

The Rocket Pellet overcomes all these problems and is the perfect solution – even with heavy reel lines it can cast long distances and is very accurate.

PUR

Sizes:  
S - M - L

## CONTROL MATCH

Code: 1023

Cralusso's newest development is a perfect solution for the problems of many anglers. We have used the very popular calibration system from our bodied wagglers and have also managed to incorporate this system into our revolutionary new straight wagglers. The slim body creates a very sensitive float and the calibration system makes very fast and accurate adjustment possible.

## CONTROL MATCH with dart

Code: 1024

The construction of this float is the same as the "Control Match", but we incorporated dart flights into the stem to allow even better flight. The antenna are inter-changeable.

Sizes:

You can adjust the 3-4-5 gr float's loading capacity between 0 and +1,2 gr.

You can adjust the 6-7-8-10 gr float's loading capacity between 0 and +1,5 gr

## PRO MATCH

Code: 1025

"Pro Match" floats contain all the useful developments that make the 'Control' version unique. As we have used brass removable heads, it is possible for finer adjustments to be made and for the carrying capacity to be increased still further. It is possible to make very quick, accurate and repeated adjustments by pushing in, or pulling out, the upper, thinner stem from the body of the float.

## PRO MATCH with dart

Code: 1026

By sliding the tube to calibrate the float you can minutely adjust the weighting.

The adjustable capacity of the 4 gr float is: between 0 and +2,5 gr  
The 5 gr and 6 gr float is: between 0 and +3,0 gr  
The 7 gr and 8 gr float is: between 0 and +3,5 gr

## New Carp floats

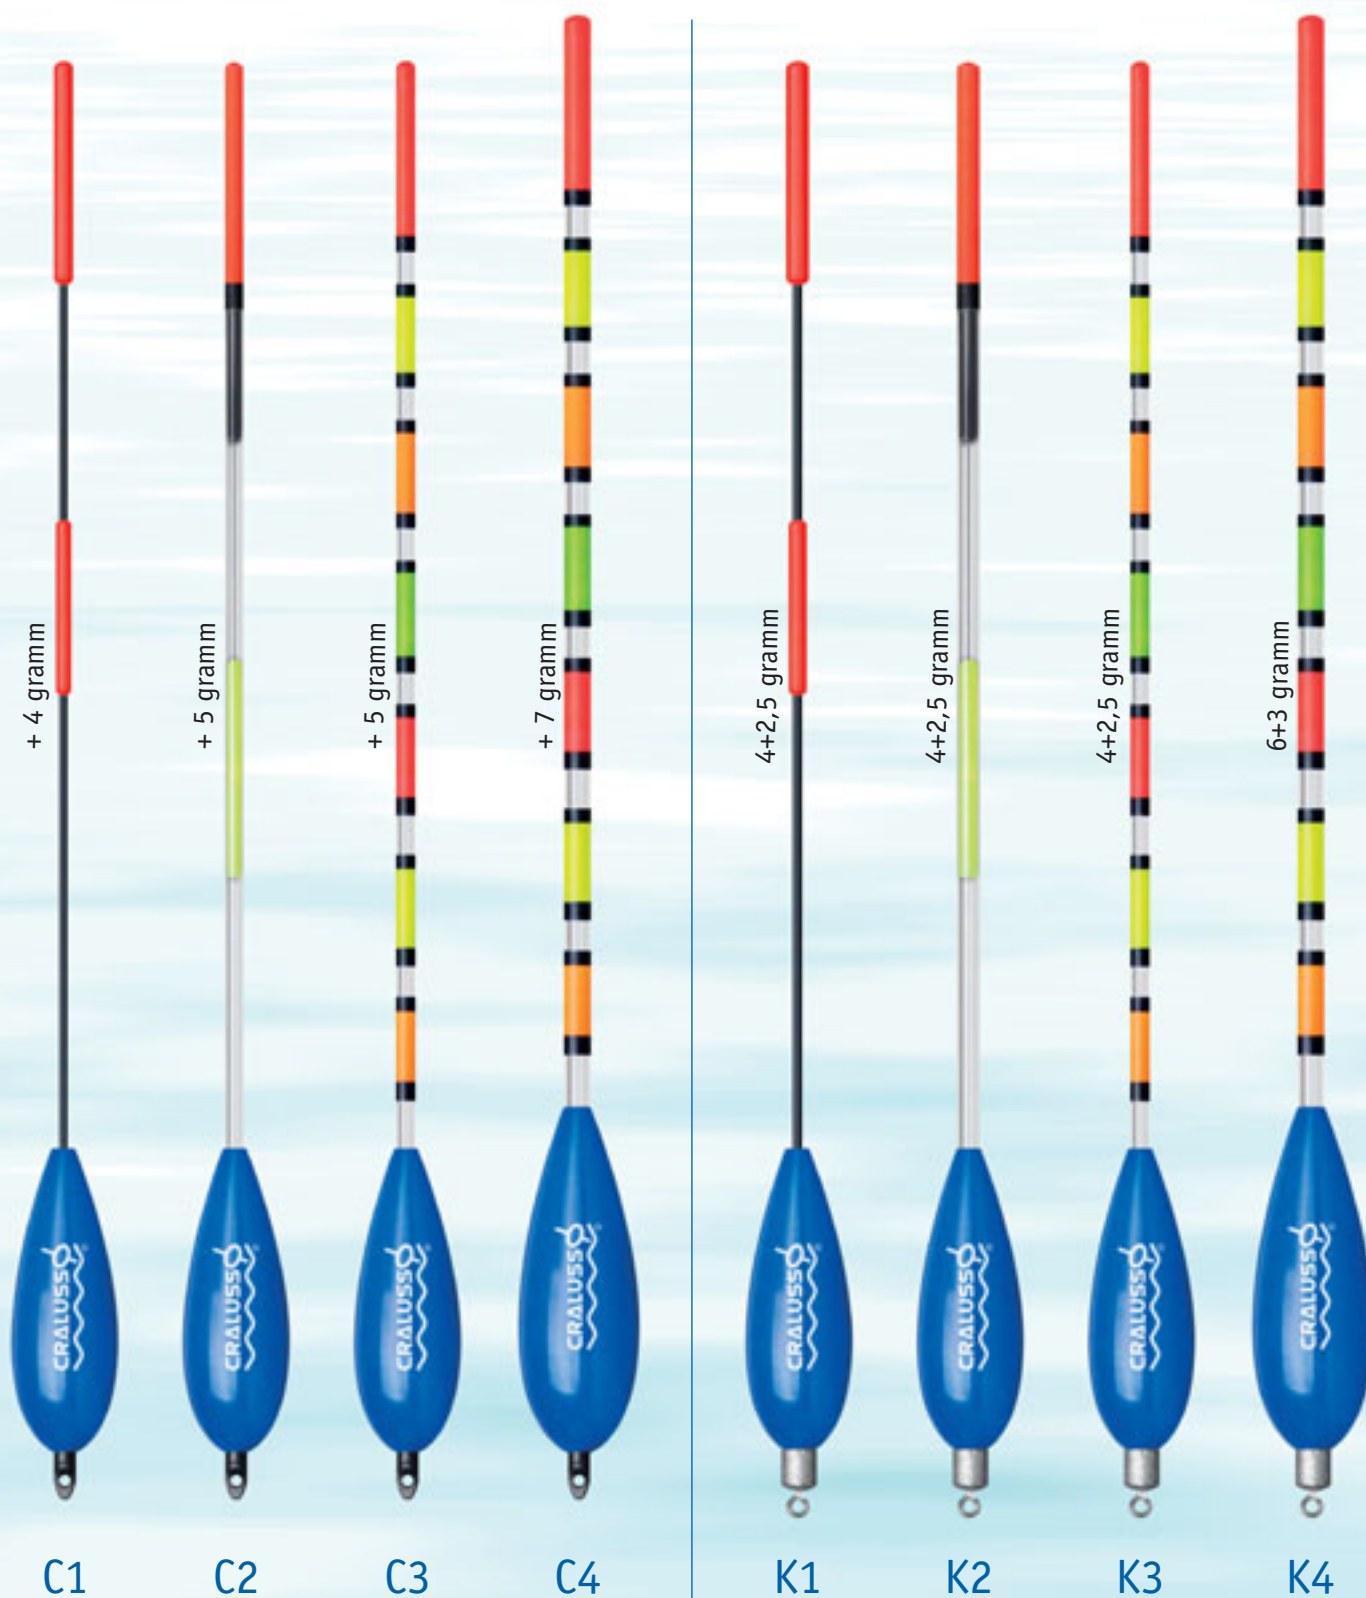

Unweighted carp floats  
with PUR body

Carp floats  
with fix weight

Code: 1090

Code: 1095

Heavy-duty fishing floats with pur body, developed to carp fishing

## Reliable floats- even in extreme conditions

Code: 1021

Float with built in weight

### Unweighted floats

Code: 1022

When we were creating the traditional type of tear drop floats it was our intention, as is always the company policy, to place the emphasis on making each model easy to use, infinitely variable and long lasting. The design allows all of the components, including the bristles, to be freely interchanged thus allowing numerous combinations to be achieved. The floats are available with carbon stems or a near transparent fibre glass stem that is less visible in water.

**Golf**

Code: 1015  
(fibr glass)  
Code: 1018  
(carbon)

**Spirit**

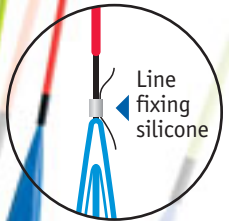

Code: 1016  
(fibr glass)  
Code: 1019  
(carbon)

**CAPRI**

Code: 1017  
(fibr glass)  
Code: 1020  
(carbon)

**Sting**

Code: 1050  
(fibr. Glass,  
fixed antenna)  
Code: 1051  
(carbon, fixed  
antenna)

The special dimpled surface of this Golf float, which reduces water tension affects, makes it an ideal choice for use on rivers, moving canals and choppy lakes.

Sizes: 1 - 1.5 - 2 - 3 - 4  
5 - 6 - 8 - 10 - 12

Universal shape which is ideal for both rivers and still waters. The protective plastic tube through the float is very hard wearing and makes the float virtually indestructible highly recommended when fishing for carp on the pole.

Sizes: 0,5 - 0,75 - 1  
1,5 - 2 - 3 - 4 - 5 - 6

This body shape allows for more sensitive presentation even more so if you use the 1 mm carbon or glass stem as the bristle. Also incredibly strong, however, and will handle big fish well.

Sizes: 0,2 - 0,3 - 0,5 - 0,75 - 1  
1,5 - 2 - 3 - 4 - 5 - 6

Our new pole float has a 3D and extremely streamlined shape resulting in exceptional sensitivity and stability.

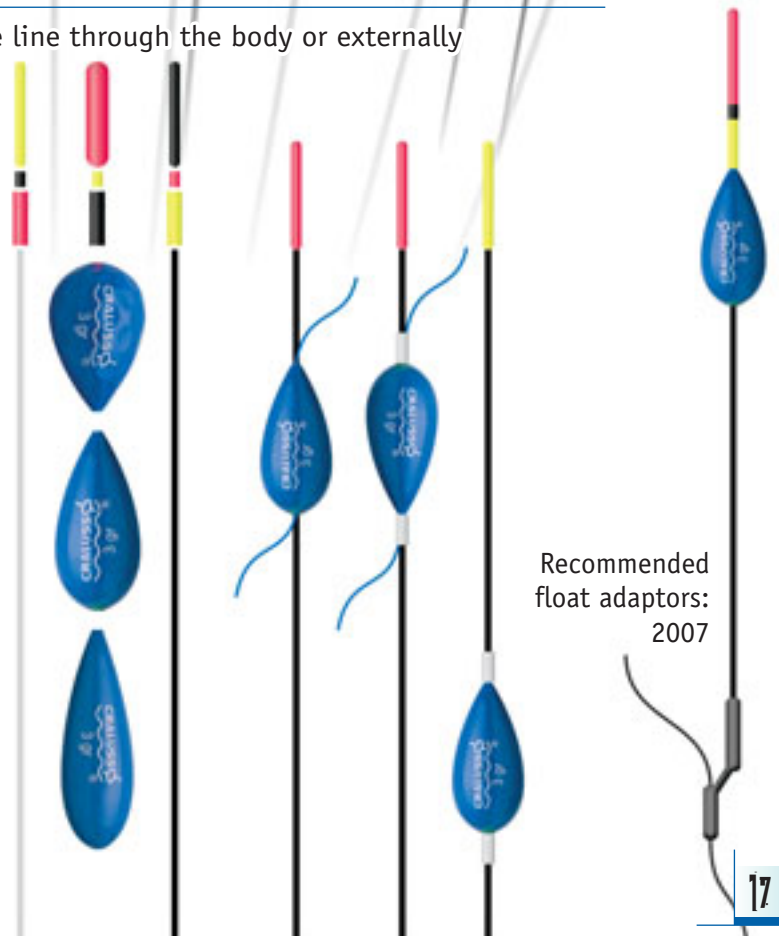

A hollow, and therefore buoyant, bristle is incorporated in this multifunctional float. It was decided not to use a side eye as these create an inherently weak point but instead of this to utilise a neat silicone sleeve at the base of the antennae.

The body is polyurethane, virtually indestructible and will not absorb water even if you do manage to damage it!

Sizes: 0,5-0,75-1,0-1,25-1,5-2,0 gr

They are well constructed and very strong. Bristles are interchangeable so you can make rigs that perform well for delicate presentation or dealing with big weights of fish.

They can be set up with the line through the body or externally

Recommended float adaptors:  
2007

Components of the tear drop floats are all interchangeable and they can be assembled in a number of ways to suit your own requirements only your imagination could limit the number of variations.

1,0 mm

## Wagglers attachment Light

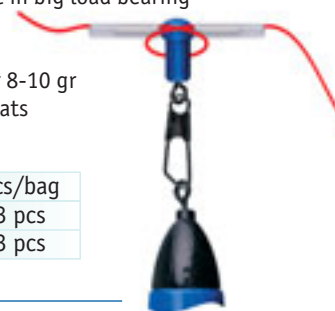

(Fixed)

Code: 2005

A sure and safe float fixing that allows quick changes. Tangles and knots are reduced because of the built in big load bearing swivel. The attach-ment is very light as carbon is used in the manufacture.

We offer the small Wagglers attachment for 8-10 gr floats, and the medium attachment for floats above 10 gr.

Size	Code	Weight	Pcs/bag
Small	2005	0,22 gr	3 pcs
Medium	2005	0,35 gr	3 pcs

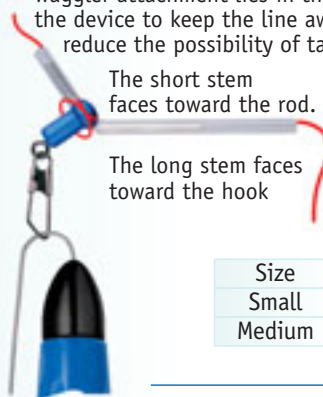

## Anti tangle waggler attachment

(Fixed)

Code: 2006

Cralusso's own development! The success of the anti-tangle waggler attachment lies in the asymmetric design which allows the device to keep the line away from the float and so greatly reduce the possibility of tangles and knots.

How to  
use this  
attachment?

Size	Code	Weight	Pcs/bag
Small	2006	0,30 gr	3 pcs
Medium	2006	0,45 gr	3 pcs

## Cralusso lines = Cralusso quality!

"PRESTIGE" fishing line – as the name implies, this range will satisfy the highest demands of the modern angler. We believe different disciplines of fishing require a line specifically designed for the purpose and that each must possess the correct properties for its intended use. As such, we have developed and tested the lines over a period of some years and are certain we are now offering a selection of the very best available at a truly competitive price.

### Hooklength Line **Soft & Strong**

2061

Great attention to detail has been paid to ensure this line has the optimal relationship between strength and suppleness. It is reliable, strong and resistant to twist and tangles.

Length (m)	Diameter (mm)	Breaking Strain (kg)
50	0,088	1,18
50	0,102	1,57
50	0,123	2,34
50	0,143	3,07
50	0,160	3,84
50	0,178	4,61
50	0,201	5,71

### feeder hooklength line

2085

New generation hooklength line, which developed for the feeder fishing, this line has more stiff and stretch.

Length (m)	Diameter (mm)	Breaking Strain (kg)
50	0,12	2,28
50	0,14	2,94
50	0,16	3,65
50	0,18	4,00
50	0,20	5,41
50	0,22	6,22

### **X**TREME

### braid hooklength line

2080

This braid hooklength made of the latest technology, weaving with 8 carriers, which ensure the cyclic cross-section. Due to this technology and PE fiber are ensure the precise and maximum tensile for the lines.

Length (m)	Diameter (mm)	Breaking Strain (kg)
15	0,08	3,8
15	0,10	5,1
15	0,12	6,3
15	0,14	7,6
15	0,16	9,5

## KEVLINE

2081 braid hooklength line

This special angling line is made from 50% Kevlar and 50% PE fibre. Sinking design, which resists damage remarkably well, and allows use under extreme conditions.

Length (m)	Breaking Strain (kg)	Breaking Strain (lb)
10	6,8	15
10	9,1	20
10	11,3	25

## Feeder & Carp

2082 braid hooklength line

This sinking braided line concentrically woven from 8 fibres has been developed to suit the needs of Feeder and Carp anglers. Thanks to its soft and strong design it can be a reliable and favoured equipment for anglers.

Length (m)	Breaking Strain (kg)	Breaking Strain (lb)
10	4,5	10
10	6,8	15
10	9,1	20

## FAST SINKING

2083 braid hooklength line

We focused entirely on making this angling line sink fast, nestle to the watercourse, to be undetectable by the fish and stay at the bottom.

Length (m)	Breaking Strain (kg)	Breaking Strain (lb)
10	5,4	12
10	8,1	18
10	11,3	25

**GENERAL**  
*Match*

2060

A very reliable line with high tensile strength  
Excellent UV and abrasion resistance with silky  
smooth surface Specially recommended for  
general use and rig making

Length (m)	Diameter (mm)	Breaking Strain (kg)
150	0,12	2,24
150	0,14	2,75
150	0,16	3,46
150	0,18	4,14
150	0,20	5,12
150	0,22	6,54
150	0,25	8,19
150	0,30	11,22
150	0,35	15,49

**Match**  
**Sinking**

2062

This new generation sinking line has been  
developed specifically for waggler fishing.  
It possesses qualities of high abrasion resistance  
and extremely low surface friction which  
enables easy casting and creates fast sink rates

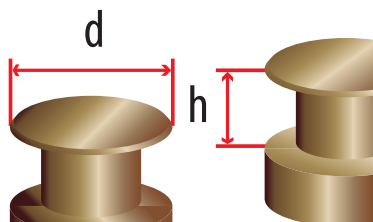

Length (m)	Diameter (mm)	Breaking Strain (kg)
150	0,14	2,21
150	0,16	2,77
150	0,18	3,31
150	0,20	4,10
150	0,23	5,23

The QSP system is a worldwide patented concept developed by Cralusso for 2014. Our company is the first to find the solution for fishermen to accurately spool up with line to the correct level without waste and so avoid multiple attempts to wind on the optimum amount. No more overfilled or underfilled spools on your reel. This system can be used with any Cralusso line displaying the 'QSP system' logo.

1

Please, measure the  
diameter and height  
of the spool!

2

Please apply the measurements into the calculator that  
you will find on our webpage!

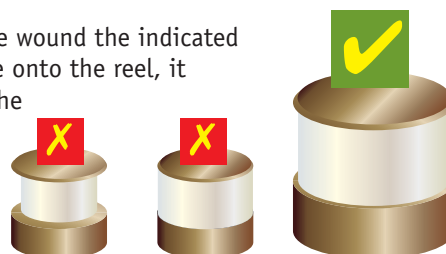

3

Select the appropriate value from  
the indicator and wind the stated  
amount onto the spool!

4

When you have wound the indicated  
amount of line onto the reel, it  
should be at the  
optimal level!

**QSP**  
SYSTEM

## FEEDER Energy

2063

This line is recommended for feeder fishing. It is very resilient and has a medium sink rate. The super low friction surface ensures fast movement through the water and positive contact with the fish

Length (m)	Diameter (mm)	Breaking Strain (kg)
150	0,18	4,4
150	0,20	5,5
150	0,22	6,9
150	0,25	8,6
150	0,30	11,8

## CARP Power

2064

A line designed to suit the high demands of Carp anglers. It has qualities of high abrasion resistance and very low surface friction that assists with long range casting and minimises damage. It also ensures fast movement through the water and positive contact with the fish

Length (m)	Diameter (mm)	Breaking Strain (kg)
350	0,25	6,56
350	0,30	7,70
350	0,36	12,38

## FEEDER & CARP

SYSTEM

CRALUSSO INNOVATION

The Navigator Match Sinking line is a world first from Cralusso. Judging distance on water is very difficult for everyone. This new generation of line provides a solution for this problem. Every 5m you will find a mark, so you can determine the distance from the color-code (every color indicates different distance) and this will assist you to fish accurately at the same distance each cast. It possesses qualities of high abrasion resistance and low surface friction, which enables effortless casting and creates fast sink rates. You will find the illustration at the bottom of the page and further information on our website.

Cralusso's unique development of the QSP system is utilised on this line and allows spooling up to be completed quickly, accurately and precisely. The QSP system helps to ensure the optimum amount of line is put onto the spool. You can find further information on page 30 and on the relevant webpage.

CRALUSSO INNOVATION

The Navigator Feeder fishing line provides great opportunities for both carp and feeder anglers.

Short and long range distances, features and clipping up points are easily identified and there is no problem if you use two or more rods. The line is marked every 5m and this will assist you to fish accurately at the same distance. Please look at the diagram and further information can be found on our webpage.

This line was developed in accordance with the requirements of high profile carp and feeder anglers - it is extremely strong, has a medium sink rate, possesses high tensile strength with low stretch and is an easily managed.

**THE SOLUTION:** The QSP system which is only provided by Cralusso! It will help to avoid the need for multiple attempts at filling spools accurately. You will find the description on page 30 and further information on our webpage.

Accurate and fine laser carving on the end to prevent from the line come-off, trust cutting to restrain the line-moving.

This hooks is developed by latest technology, cutting the needle point by three different degree with uniqueedge form.

## Hooks

The **biggest fish** at the 2014 **world championship** held in Croatia, a 4,6kg barbel was caught on the fast-flowing Drava by **Arjan Klop**, member of the **world champion Dutch team** using our **2445 Chinu hook**. This hook has also proven its worth many times! Made of forged Japanese steel, extremely sharp, despite its medium thick stem it is remarkably strong. A reliable companion during tiring.

## Globular weight with central hole, precise cut and protector tube

The quality manufacture and tube makes it possible to fix perfectly centrally and without causing damage

## Olive weights with silicone,- two functions in one lead

If the line is threaded through the tube, the olivette can be used as a sliding weight.

If fixed to the line by silicon tubes, then it can be used as changeable weight.
